“Pengetahuan Tentang 3M di Era *New Normal* Pandemi Covid-19 Pada Santri Usia Sekolah di TPQ Al - Amin Waru Sidoarjo”

Awal pandemi Covid-19, anak - anak disebut sebagai kelompok usia yang relatif tidak rentan terkena virus *corona*. Meskipun demikian, tingkat penularan virus *corona* pada anak di Indonesia tergolong cukup tinggi sehingga harus membuat orang tua waspada. Gerakan 3M merupakan upaya yang dapat dilakukan untuk mencegah sekaligus memutus rantai penularan Covid-19. Tujuan penelitian ini adalah untuk mengetahui pengetahuan tentang 3M di Era *New Normal* pandemi Covid-19 pada santri usia sekolah di TPQ Al - Amin Waru Sidoarjo.

Jenis penelitian ini menggunakan metode deskriptif. Instrumen penelitian menggunakan kuesioner. Sampel penelitian berjumlah 50 santri, Teknik pengambilan sampel menggunakan *Purposive Sampling* kemudian dianalisis menggunakan metode deskriptif kuantitatif.

Hasil penelitian menunjukkan bahwa pengetahuan santri usia sekolah tentang 3M di Era *New Normal* pandemi Covid-19 di TPQ Al - Amin Waru Sidoarjo setengahnya (50%) santri memiliki pengetahuan yang cukup tentang memakai masker, hampir seluruhnya (82%) santri memiliki pengetahuan yang cukup tentang menjaga jarak, sebagian besar (56%) santri memiliki pengetahuan yang cukup tentang mencuci tangan, dan sebagian besar (64%) santri memiliki pengetahuan yang cukup tentang 3M.

Kepada pihak TPQ diharapkan dapat menambah wawasan pengetahuan santri dengan cara menempelkan poster pencegahan Covid-19 pada dinding TPQ dan memberikan penyuluhan tentang pencegahan penularan Covid-19.

Kata kunci : Pengetahuan, 3M Pencegahan Covid-19, Santri Usia Sekolah.

“Knowledge About 3M in the New Normal Era amid Covid-19 Pandemic in School-age Students in the TPQ Al – Amin Waru Sidoarjo”

The early of Covid-19 pandemic, children were referred to as an age group that was relatively less susceptible to virus corona. Even so, the rate of the virus corona transmission in Indonesia’s children is quite highly, so the parents should being alert. The 3M movement is an effort to prevent as well as break the chain of the Covid-19 transmission. The purpose of this study was to determine knowledge about 3M in the New Normal Era of the Covid-19 pandemic among school-age students at TPQ Al - Amin Waru Sidoarjo.

This research used descriptive methods. The research instrument used a questionnaire. The research sample consisted of 50 students. The sampling technique used purposive sampling and then analyzed using quantitative descriptive methods.

The results showed that the knowledge of school-age students about 3M in the New Normal Era amid Covid-19 pandemic at TPQ Al - Amin Waru Sidoarjo, half of it (50%) students had sufficient knowledge about wearing masks, almost all (82%) students have sufficient knowledge about keeping a distance, most (56%) students have sufficient knowledge about washing hands and most (64%) students had sufficient knowledge about 3M.

It is hoped that the TPQ will be able to broaden the knowledge of the students by sticking posters on the TPQ walls and providing information about preventing the Covid-19 transmission.

Keywords : Knowledge, 3M Covid-19 Prevention, School-age students.
