SANITARY CONDITION AND PERSONAL HYGIENE OF THE TEMPE INDUSTRY IN SAMBIREMBE VILLAGE, KARANGREJO DISTRICT, MAGETAN REGENCY

xiii + 63 Pages + 1 Image + 9 Attachments + 13 Tables

Tempe IRTP located in Sambiremebe Village, it is known that the industrial sanitation of the location and the environment is not maintained, the buildings and facilities are dirty, there are no sanitary hygiene facilities such as hand washing facilities. Personal hygiene of handlers who do not use personal protective equipment and eat during the production process. The purpose of this study was to determine the sanitation and personal hygiene conditions of the tempe industrial handlers in Sambiremebe Village, Karangrejo District, Magetan Regency.

This type of research is descriptive with a *cross sectional approach*. In determining the sample using a total sampling technique. The sample population of the tempe industry is 5 IRTPs. The data obtained were then processed and presented in tabular form and then analyzed descriptively.

The results showed that the IRTP Tempe Sanitation condition was categorized as sufficient (40%). Personal hygiene of the handlers is included in the sufficient category (38%).

The conclusion from the result of the study is that the sanitation conditions and personal hygiene of the handlers are in the sufficient category. The advice given to IRTP owners is to routinely clean the IRTP environment, provide hand washing facilities, and place the cowshed separately from the production site. Handlers routinely cat nails, use personal protective equipment, do not eat during production.
