**ABSTRACT**

Public places or public service facilities are places that have the facilities and capabilities regarding the occurrence of disease transmission. Healthy Market is an effort that is integrative and synergistic with various other efforts that are able to guarantee clean, safe, comfortable and healthy market conditions so that all activities in the market can run according to their objectives and designations according to the Regulation of the Minister of Health of the Republic of Indonesia Number 17 of 2020 About Healthy Markets. The reason for this research is a landfill, sewer/drainasse, toilets that do not meet the requirements. This study aims to assess the sanitary conditions of the Tourism Market, Plaosan District, Magetan Regency.

This research is a descriptive study with a survey design used the variables of Garbage Disposal, Sewer/drainasse, Toilet, Clean Water, and Hand Washing Place. Compilation of data used data editing, data coding, scoring, data interpretation. study this then conducted analysis data which obtained by descriptive.

The results of the study showed that they did not meet the requirements, namely the Waste Disposal Site, Sewerage/drainasse, and toilets from the observations. The head of the market needs to provide adequate sanitation facilities such as a hand washing area near the toilet, the person in charge of the toilet needs to keep the toilet clean more.
