HUBUNGAN PENGETAHUAN DAN KEPATUHAN KUNJUNGAN IBU KE POSYANDU DENGAN TREN PERTUMBUHAN BALITA DI POSYANDU VILLA JASMINE 3 KECAMATAN SIDOARJO

ABSTRAK

Latar Belakang. Tren pertumbuhan balita dipengaruhi oleh beberapa faktor yakni pengetahuan ibu dan kepatuhan kunjungan ibu ke posyandu. **Tujuan Penelitian.** Untuk menganalisis hubungan pengetahuan dan kepatuhan kunjungan ibu ke posyandu dengan tren pertumbuhan balita pasca pandemi di Posyandu Villa Jasmine 3 Kecamatan Sidoarjo Kabupaten Sidoarjo. **Metode Penelitian.** Penelitian ini ialah penelitian analitik dengan pendekatan *cross sectional*. Teknik pengambilan sampel yang digunakan yakni Teknik *Simple Random Sampling* yaitu dari populasi sebanyak 96 ibu balita, diambil sebesar 49 sampel. Pengumpulan data menggunakan pengisian kuisioner pengetahuan melalui wawancara, melihat KMS untuk melihat tren pertumbuhan dan melihat buku absen untuk melihat kepatuhan kunjungan. **Hasil Penelitian.** Dalam penelitian ini ibu balita rata-rata berusia 31 tahun, berpendidikan Diploma/Sarjana, memiliki pengetahuan yang kurang baik, tingkat kepatuhan ke posyandu yang baik namun sebagian besar balita tren pertumbuhannya tidak sesuai dengan KBM selama 3 bulan (67,3%). **Kesimpulan.** Sehubungan dengan adanya hubungan antara pengetahuan dan kepatuhan kunjungan ibu ke posyandu dengan tren pertumbuhan balita pasca pandemi di Posyandu Villa Jasmine 3 Kecamatan Sidoarjo Kabupaten Sidoarjo maka diharapkan kader posyandu dapat melakukan edukasi kepada ibu balita mengenai pentingnya posyandu serta diharapkan ibu balita belajar mengenai cara membaca tren pertumbuhan balita.

THE CORRELATION OF KNOWLEDGE AND MOTHER'S VISIT COMPLIANCE WITH GROWTH TRENDS OF CHILDREN UNDER FIVE AT "POSYANDU VILLA JASMINE 3" SIDOARJO DISTRICT

ABSTRACT

Background. Growth trends of children under five be affected by several factors including mother's knowledge and mother's visit compliance to posyandu. **Destination.** To analyse the corrrelations of mother's knowledge and mother's visit compliance with growth trends of children under five post pandemi at Posyandu Villa Jasmine 3 Sidoarjo District Sidoarjo Regency **Method.** The sampling technique used the Simple Random Sampling Technique, namely from a population of 96 mothers under five, 49 samples were taken. Data collection used with filling out knowledge questionnaires through interviews, viewing KMS to see growth trends and viewing attendance books to see visit compliance. **Result.** In this study, the average age of mothers under five was 31 years old, had a Diploma/Bachelor degree, had less knowledge, had a good level of visit compliance to Posyandu, but most of the growth trends of childrens did not match by KBM process for 3 months (67.3%). **Conclusion.** In connection with the relationship between knowledge and mother's visit compliance to the posyandu with the post-pandemic growth trend of children under five at Posyandu Villa Jasmine 3, Sidoarjo District, Sidoarjo Regency, it is hoped that posyandu cadres can educate mothers under five about the importance of posyandu and mother's under five can learn about how to read growth trends of children.
